

Testimonial

Global Sustain is an expert network, which provides in-depth information, research, training and meet and greet opportunities to many companies, organisations and NGOs.

Municipal Waste Europe has been a member of the Global Sustain community since 2012, exchanging knowledge, experience and best practice. Through its work the Global Sustain network has created numerous opportunities for Municipal Waste Europe to share our views on the public responsibility for waste management and on the achievement of a circular economy.

Global Sustain is an excellent vehicle through which to keep up with leading-edge sustainability trends and develop relationships with responsible companies around the world. Additionally Global Sustain conferences are thought-provoking, take you out of your daily 'box' and put you into a collaborative format with proactive business leaders with whom you can contribute to thought leadership, present and discuss current thinking.

Kind regards,

Vanya Veras
